Education

VIT Bhopal University

Bachelor of Technology, Computer Science & Engineering (AI & ML) | CGPA: **8.03/10.0**

Sept 2023 – May 2027

Bhopal, India

Montfort Inter College

Class 10 & 12 (Higher Secondary)

Apr 2021 – Mar 2023

Lucknow, India

Technical Skills

Languages: Python, JavaScript, C++, Java

AI, ML & Automation: LLMs, RAG, Vector Embeddings, LangChain, Prompt Engineering, AI Agent Workflows, TensorFlow, Scikit-learn

Web & Backend: HTML5, CSS3, React.js, Vite, Node.js, Express.js, REST APIs, JSON

Databases & Tools: PostgreSQL (via Supabase), MongoDB, SQL, Docker, Git

Practices: API Design, Debugging & Testing, CI/CD (Render), Version Control

Work Experience

Future Smart AI

Sept 2025 – Feb 2026

Content Research Intern | [Link](#)

Remote

- Tested and benchmarked more than **1,000 AI tools** across **4 categories** – video generation, image generation, captioning, and content creation – to see how each performed against its marketing claims.
- Authored comparative reports that judged each tool against **3 criteria** – strengths, weaknesses, and best-fit use case – helping product and content teams choose the right tool faster.

Projects

Interview IQ | [Live Demo](#) | [GitHub](#)

July 2025 – Aug 2025

- Developed a full-stack AI interview-preparation platform with the **React.js** framework that generates **3 types** of study material – answers, summaries, and practice questions – from a user's own uploaded documents instead of generic AI knowledge.
- Built a **Retrieval-Augmented Generation** pipeline with **LangChain** and a vector database, letting the platform's AI answer from documents the user has uploaded, and used **Supabase** together with **PostgreSQL** for user login and session storage.
- Integrated **VAPI** to power real-time, voice-based mock interviews with an AI interviewer, and added a resume gap analyzer that flags specific skills to improve – **2 tools** working together for interview preparation.

AI-EchOo E-Commerce Platform | [Live Demo](#) | [GitHub](#)

Feb 2026

- Architected a full-stack e-commerce platform, using the **React.js** framework on the frontend and **Supabase** with **PostgreSQL** on the backend, supporting **6 shopping flows** – listings, search, cart, wishlist, checkout, and order tracking – plus an admin dashboard for products, users, and orders.
- Engineered a shopping assistant powered by **Groq** with **2 core capabilities** – recommending and comparing products – grounded by **Retrieval-Augmented Generation** in live product data, so every suggestion genuinely exists in the store.
- Designed and managed the **PostgreSQL** database schema, covering **4 linked tables** for products, orders, carts, and payments, and resolved data-synchronization issues between the website and the database.

Desktop AI Voice Assistant | [Live Demo](#) | [GitHub](#)

May 2025

- Programmed a Python-based **AI agent** that accepts voice or text commands and responds by opening applications, searching the web, playing YouTube videos, or generating content and images – **4 categories** of commands in total.
- Combined **Groq** and **Google Generative AI** as **2 language models** behind natural conversational responses, added full two-way voice support through speech-to-text and text-to-speech, and built the interface using **PyQt5**.
- Implemented browser automation for **2 common workflows** – searching LinkedIn and looking things up on Chrome – so the assistant completes these tasks directly instead of just explaining the steps.

Achievements

Hackathon Winner – finished 1st among more than **100 participants** at the AI Demos Monthly Hackathon for an innovative AI solution. ([Link](#))

Published a **Carbon Credits Dataset** on Mendeley Data for carbon credit prediction research. ([Dataset](#) | [Predictor](#))

Certifications

- Microsoft Azure Fundamentals (AZ-900)** – Cloud computing, Azure services, security ([Certificate](#))
- Applied Machine Learning in Python** – University of Michigan, Coursera ([Certificate](#))
- NPTEL Cloud Computing** – IIT Kharagpur ([Certificate](#))
- Face Prep MERN Stack** – MongoDB, Express.js, React.js, Node.js ([Certificate](#))
